CAREER OBJECTIVE

Computer Science (Data Science) student skilled in Python, Java, Machine Learning, Data Analysis, and Software Development. Experienced in developing fraud detection, recommendation systems, and computer vision applications. Seeking opportunities in Data Science, Data Analytics, and Software Development.

EDUCATION

B.Tech CSE (Data Science), Maharishi Markandeshwar Engineering College CGPA: 8.1/10	2023–2027
Class XII, Bihar School Examination Board (BSEB) Percentage: 78.6%	2023
Class X, Central Board of Secondary Education (CBSE) Percentage: 66%	2021

TECHNICAL SKILLS

Programming: Python, Java, HTML, C
Data Analysis: Pandas, NumPy, Matplotlib, Excel
Machine Learning: Scikit-learn, Classification, Model Evaluation
Tools: SQL, Power BI, Streamlit
Version Control: Git, GitHub
Core: DSA, OOP, DBMS, Problem Solving

EXPERIENCE

Prodigy InfoTech <i>Data Science Intern</i>	Jun 2025 – Jun 2025
- Performed data preprocessing and exploratory data analysis on 5,000+ records using Python. - Built machine learning models achieving 85%+ prediction accuracy. - Evaluated model performance using Accuracy, Precision, Recall, and F1-Score metrics. - Utilized Pandas, NumPy, Matplotlib, and Scikit-learn for data analysis and visualization.	

PROJECTS

- Email Fraud Detection**
- Developed an NLP-based fraud detection system achieving 92% email classification accuracy.
 - Identified phishing and spam emails through text preprocessing and machine learning techniques.
- Hand Sign Recognition**
- Developed a real-time hand gesture recognition system achieving 90%+ accuracy.
 - Applied computer vision and deep learning techniques for gesture classification.
- Medical Recommendation System**
- Developed a disease prediction model achieving 88% prediction accuracy.
 - Generated treatment recommendations using healthcare datasets and machine learning algorithms.

CERTIFICATIONS

- Deloitte Virtual Job Simulation (Data Analytics)
- Data Science Internship Certificate – Prodigy InfoTech

ACHIEVEMENTS

- Solved 150+ LeetCode problems.
- Participated in Hackathons and Coding Competitions.
- Built multiple Machine Learning and Data Science projects.
